

APPENDIX - CO

MADURAI KAMARAJ UNIVERSITY

(University with Potential for Excellence)

M.Sc. Computer Science (Semester)

(With effect from 2023-24 onwards)

CHOICE BASED CREDIT SYSTEM REVISED SYLLABUS

REGULATIONS SCHEME OF EXAMINATIONS AND SYLLABUS

1. Course Objective:

- To prepare the students to manage the software components in a computer independently and to be a Programmer/Project Leader.
- To motivate the students to take up Academic Research in Computer Science and other streams.

2. **Eligibility for Admission:** Students who studied B.Sc.(CS), B.Sc. (IT) and BCA with +2 Level Mathematics.

3. **Duration of the Course:** The students shall undergo the prescribed course of study for a period of not less than two -academic years (Four semesters).

4. **Medium of Instruction:**English.

5. Eligibility for the Degree:

- I. A Candidate shall be eligible for the award of the degree on completion of the prescribed course of study and passing all the prescribed external examinations.
- II. Attendance progress, internal examinations, conduct certificate from the Head of the Institution shall be required for taking the external examination.
- III. The passing minimum and the ranking are as per the existing rule of the Choice Based Credit System for the affiliated college of the University.

LEARNING OUTCOMES-BASED CURRICULUM FRAMEWORK FOR POSTGRADUATE EDUCATION	
Programme	M.Sc., Computer Science
Programme Code	
Duration	PG - Two Years
Programme Outcomes (Pos)	<p>PO1: Problem Solving Skill Apply knowledge of Management theories and Human Resource practices to solve business problems through research in Global context.</p> <p>PO2: Decision Making Skill Foster analytical and critical thinking abilities for data-based decision-making.</p> <p>PO3: Ethical Value Ability to incorporate quality, ethical and legal value-based perspectives to all organizational activities.</p> <p>PO4: Communication Skill Ability to develop communication, managerial and interpersonal skills.</p> <p>PO5: Individual and Team Leadership Skill Capability to lead themselves and the team to achieve organizational goals.</p> <p>PO6: Employability Skill Inculcate contemporary business practices to enhance employability skills in the competitive environment.</p> <p>PO7: Entrepreneurial Skill Equip with skills and competencies to become an entrepreneur.</p> <p>PO8: Contribution to Society Succeed in career endeavors and contribute significantly to society.</p> <p>PO 9 Multicultural competence Possess knowledge of the values and beliefs of multiple cultures and a global perspective.</p> <p>PO 10: Moral and ethical awareness/reasoning Ability to embrace moral/ethical values in conducting one's life.</p>
Programme Specific Outcomes (PSOs)	<p>PSO1 – Placement To prepare the students who will demonstrate respectful engagement with others' ideas, behaviors, beliefs and apply diverse frames of reference to decisions and actions.</p> <p>PSO 2 - Entrepreneur To create effective entrepreneurs by enhancing their critical thinking, problem solving, decision making and leadership skill that will facilitate startups and high potential organizations.</p> <p>PSO3 – Research and Development Design and implement HR systems and practices grounded in research that comply with employment laws, leading the organization</p>

	<p>towards growth and development.</p> <p>PSO4 – Contribution to Business World To produce employable, ethical and innovative professionals to sustain in the dynamic business world.</p> <p>PSO 5 – Contribution to the Society To contribute to the development of the society by collaborating with stakeholders for mutual benefit.</p>

METHODS OF EVALUATION		
Internal Evaluation	Continuous Internal Assessment Test	25 Marks
	Assignments / Snap Test / Quiz	
	Seminars	
	Attendance and Class Participation	
External Evaluation	End Semester Examination	75 Marks
Total		100 Marks
METHODS OF ASSESSMENT		
Remembering (K1)	<ul style="list-style-type: none"> • The lowest level of questions require students to recall information from the course content • Knowledge questions usually require students to identify information in the textbook. 	
Understanding (K2)	<ul style="list-style-type: none"> • Understanding of facts and ideas by comprehending, organizing, comparing, translating, interpolating and interpreting in their own words. • The questions go beyond simple recall and require students to combine data together 	
Application (K3)	<ul style="list-style-type: none"> • Students have to solve problems by using/applying a concept learned in the classroom. • Students must use their knowledge to determine an exact response. 	
Analyze (K4)	<ul style="list-style-type: none"> • Analyzing the question is one that asks the student to break down something into its component parts. • Analyzing requires students to identify reasons, causes or motives and reach conclusions or generalizations. 	
Evaluate (K5)	<ul style="list-style-type: none"> • Evaluation requires an individual to make judgment on something. • Questions to be asked to judge the value of an idea, a character, a work of art, or a solution to a problem. • Students are engaged in decision-making and problem-solving. • Evaluation questions do not have a single right answer. 	
Create (K6)	<ul style="list-style-type: none"> • The questions of this category challenge students to get engaged in creative and original thinking. • Developing original ideas and problem-solving skills 	

**PROGRAMME OUTCOMES (PO) - PROGRAMME SPECIFIC OUTCOMES (PSO)
MAPPING**

PROGRAMME SPECIFIC OUTCOMES (PSO)					
	PO1	PO2	PO3	PO4	PO5
PSO1	3	3	3	3	3
PSO2	3	3	3	3	3
PSO3	3	3	3	3	3
PSO4	3	3	3	3	3
PSO5	3	3	3	3	3

Level of Correlation between PO's and PSO's

(Suggested by UGC as per Six Sigma Tool – Cause and Effect Matrix)

Assign the value

1 – Low

2 – Medium

3 – High

0 – No Correlation

Note:

*Ability Enhancement papers AECSS1,AECSS2,AECSS3,and AECSS4may be offered by the Department concerned to improve the soft skills of the students.

**Skill Enhancement papers SEC1 and SEC4 may be offered by the Department concerned to enhance the Skill of the students.

I – SEMESTER

Coursecode	Core - I	ANALYSIS&DESIGNOF ALGORITHMS	L	T	P	C
Core/Elective/Supportive		Core	5	-	-	4
Pre-requisite		Basic Data Structures & Algorithms	CIA Version		ESE 75	
CourseObjectives:						
Themain objectivesof thiscourseareto:						
<ol style="list-style-type: none"> 1. EnablethestudentstolearntheElementary DataStructuresandalgorithms. 2. Presentsanintroductiontothealgorithms,theiranalysisand design 3. DiscussvariousmethodslikeBasicTraversalAndSearchTechniques,divideandconquer method, Dynamic programming, backtracking 4. Understoodthevariousdesignandanalysisofthe algorithms. 						
ExpectedCourseOutcomes:						
Onthesuccessfulcompletionofthecourse,studentwillbeableto:						
1	Get knowledge about algorithms and determines their time complexity. Demonstrate specific search and sort algorithms using divide and conquer technique.					K1,K2
2	GaingoodunderstandingofGreedyMethodandits algorithm.					K2,K3
3	Abletodescribeaboutgraphsusingdynamicprogrammingtechnique.					K3,K4
4	Demonstratethe concept ofbacktracking&branchandboundtechnique.					K5,K6
5	Exploretetraversaland searchingtechniqueandapplyitfortreesandgraphs.					K6
K1-Remember;K2-Understand;K3-Apply;K4-Analyze;K5-Evaluate; K6-Create						
Unit:1						
INTRODUCTION			15hours			
Introduction: - Algorithm Definition and Specification – Space complexity-Time Complexity- Asymptotic Notations - Elementary Data Structure: Stacks and Queues – Binary Tree - Binary Search Tree - Heap – Heapsort- Graph.						
Unit:2						
TRAVERSALANDSEARCHTECHNIQUES			15hours			
Basic Traversal And Search Techniques: Techniques for Binary Trees-Techniques for Graphs - Divide and Conquer: - General Method – Binary Search – Merge Sort – Quick Sort.						
Unit:3						
GREEDY METHOD			15hours			
TheGreedyMethod:-GeneralMethod–KnapsackProblem–MinimumCostSpanningTree– Single Source Shortest Path.						
Unit:4						
DYNAMICPROGRAMMING			15hours			
DynamicProgramming-GeneralMethod–MultistageGraphs–AllPairShortestPath–Optimal Binary Search Trees – 0/1 Knapsacks – Traveling Salesman Problem – Flow Shop Scheduling.						

Unit:5	BACKTRACKING	13hours
Backtracking:-GeneralMethod–8-QueensProblem–SumOfSubsets–GraphColoring– Hamiltonian Cycles – Branch And Bound: - The Method – Traveling Salesperson.		
Unit:6	ContemporaryIssues	2 hours
Expertlectures,onlineseminars– webinars		
TotalLecturehours		75hours

Coursecode	Core – II	OBJECTORIENTEDANALYSISAND DESIGN & C++	L	T	P	C
Core/Elective/Supportive		Core	5	-	-	4
Pre-requisite		Basics of C++ and Object Oriented Concepts	CIA 25		ESE 75	
CourseObjectives:						
Themainobjectivesofthis courseareto:						
<ol style="list-style-type: none"> 1. Presenttheobjectmodel,classesandobjects,objectorientation,machineviewandmodel management view. 2. Enablethestudentstolearnthebasicfunctions,principlesandconceptsofobjectoriented analysis and design. 3. EnablethestudentstounderstandC++languagewithrespecttoOOAD 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	UnderstandtheconceptofObject-Orienteddevelopmentandmodelingtechniques					K1,K2
2	Gainknowledgeaboutthevariousstepsperformedduringobjectdesign					K2,K3
3	Abstractobject-basedviewsforgenericsoftwaresystems					K3
4	LinkOOADwithC++ language					K4,K5
5	Applythebasicconcept ofOOPsandfamiliarizetowriteC++ program					K5,K6
K1-Remember;K2-Understand;K3-Apply;K4-Analyze;K5-Evaluate; K6-Create						
Unit:1	OBJECTMODEL					15hours
The Object Model: The Evolution of the Object Model – Elements of the Object Model – Applying the Object Model. Classes and Objects: The Nature of an Object – Relationship among Objects.						
Unit:2	CLASSESANDOBJECTS					15hours
Classes and Object: Nature of Class – Relationship Among classes – The Interplay of classes and Objects. Classification: The importance of Proper Classification –identifying classes and objects –Key Abstractions and Mechanism.						
Unit:3	C++INTRODUCTION					15hours
IntroductiontoC++-InputandoutputstatementsinC++-Declarations-controlstructures– Functions in C++.						
Unit:4	INHERITANCEANDOVERLOADING					13hours

Classes and Objects – Constructors and Destructors – operator overloading – Type Conversion – Inheritance – Pointers and Arrays.

Unit:5	POLYMORPHISM AND FILES	15 hours
Memory Management Operators – Polymorphism – Virtual functions – Files – Exception Handling – String Handling – Templates.

Coursecode	Elective - I	ADVANCED SOFTWARE ENGINEERING	L	T	P	C
Core/Elective/Supportive		Elective	5	-	-	3
Pre-requisite		Basics of Software Engineering & SPM	CIA 25		ESE 75	
Course Objectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. Introduce to Software Engineering, Design, Testing and Maintenance. 2. Enable the student to learn the concepts of Software Engineering. 3. Learn about Software Project Management, Software Design & Testing. 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand about Software Engineering process					K1, K2
2	Understand about Software project management skills, design and quality management					K2, K3
3	Analyze on Software Requirements and Specification					K3, K4
4	Analyze on Software Testing, Maintenance and Software Re-Engineering					K4, K5
5	Design and conduct various types and levels of software quality for a software project					K5, K6
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
Unit:1		INTRODUCTION			15hours	
Introduction: The Problem Domain – Software Engineering Challenges - Software Engineering Approach – Software Processes: Software Process – Characteristics of a Software Process – Software Development Process Models – Other software processes.						
Unit:2		SOFTWARE REQUIREMENTS			15hours	
Software Requirements Analysis and Specification : Requirement engineering – Type of Requirements – Feasibility Studies – Requirements Elicitation – Requirement Analysis – Requirement Documentation – Requirement Validation – Requirement Management – SRS - Formal System Specification – Axiomatic Specification – Algebraic Specification - Case study: Student Result management system. Software Quality Management – Software Quality, Software Quality Management System, ISO 9000, SEI CMM.						
Unit:3		PROJECT MANAGEMENT			15hours	
Software Project Management: Responsibilities of a software project manager – Project planning – Metrics for Project size estimation – Project Estimation Techniques – Empirical Estimation Techniques – COCOMO – Halstead’s software science – Staffing level estimation – Scheduling – Organization and Team Structures – Staffing – Risk management – Software Configuration Management – Miscellaneous Plan.						

Unit:4	SOFTWAREDESIGN	15hours
Software Design: Outcome of a Design process – Characteristics of a good software design – Cohesion and coupling - Strategy of Design – Function Oriented Design – Object Oriented Design - Detailed Design - IEEE Recommended Practice for Software Design Descriptions.		
Unit:5	SOFTWARETESTING	13hours
Software Testing: A Strategic approach to software testing – Terminologies – Functional testing– Structural testing – Levels of testing – Validation testing - Regression testing – Art of Debugging–Testingtools-Metrics-ReliabilityEstimation.SoftwareMaintenance -Maintenance Process - Reverse Engineering – Software Re-engineering - Configuration Management Activities.

Pre-requisite	Basics of RDBMS & Algorithms		CIA 25	ESE 75		
CourseObjectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. Enable the students to learn the concepts of Mining tasks, classification, clustering and Data Warehousing. 2. Develop skills of using recent data mining software for solving practical problems. 3. Develop and apply critical thinking, problem-solving, and decision-making skills. 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand the basic data mining techniques and algorithms					K1, K2
2	Understand the Association rules, Clustering techniques and Data warehousing contents					K2, K3
3	Compare and evaluate different data mining techniques like classification, prediction, Clustering and association rule mining					K4, K5
4	Design data warehouse with dimensional modeling and apply OLAP operations					K5, K6
5	Identify appropriate data mining algorithms to solve real world problems					K6
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
Unit:1	BASICS AND TECHNIQUES					15 hours
Basic data mining tasks – data mining versus knowledge discovery in databases – data mining issues – data mining metrics – social implications of data mining – data mining from a database perspective.						
Data mining techniques: Introduction – a statistical perspective on data mining – similarity measures – decision trees – neural networks – genetic algorithms.						
Unit:2	ALGORITHMS					13 hours
Classification: Introduction – Statistical – based algorithms – distance – based algorithms – decision tree – based algorithms – neural network – based algorithms – rule – based algorithms – combining techniques.						
Unit:3	CLUSTERING AND ASSOCIATION					15 hours
Clustering: Introduction – Similarity and Distance Measures – Outliers – Hierarchical Algorithms – Partitional Algorithms.						
Association rules: Introduction - large item sets - basic algorithms – parallel & distributed algorithms – comparing approaches- incremental rules – advanced association rules techniques – measuring the quality of rules.						
Unit:4	DATA WAREHOUSING AND MODELING					15 hours
Data warehousing: introduction – characteristics of a data warehouse – data marts – other aspects						

Ofdatamart.Online analyticalprocessing:introduction –OLTP&OLAPsystems		
Datamodeling –star schema for multidimensional view –data modeling – multifactstar schema or snow flake schema – OLAP TOOLS – State of the market – OLAP TOOLS and the internet.		
Unit:5	APPLICATIONSOFDATA WAREHOUSE	15 hours
Developing a data WAREHOUSE: why and how to build a data warehouse –data warehouse architectural strategies and organization issues - design consideration – data content – metadata distribution of data – tools for data warehousing – performance considerations – crucial decisions in designing a data warehouse. Applications of data warehousing and data mining in government: Introduction - national data warehouses – other areas for data warehousing and data mining.		
Unit:6	ContemporaryIssues	2 hours
Expertlectures,onlineseminars –webinars		
	TotalLecturehours	75 hours

II – SEMESTER

Coursecode	Core – V	ADVANCED OPERATING SYSTEMS	L	T	P	C
Core/Elective/Supportive		Core	5	-	-	4
Pre-requisite		Basics of OS & its functioning	CIA 25		ESE 75	
Course Objectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. Enable the student to learn the different types of operating systems and their functioning. 2. Gain knowledge on Distributed Operating Systems 3. Gain insight into the components and management aspects of real-time and mobile operating systems. 4. Learn case studies in Linux Operating Systems 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand the design issues associated with operating systems					K1, K2
2	Master various process management concepts including scheduling, deadlocks and distributed file systems					K3, K4
3	Prepare Real Time Task Scheduling					K4, K5
4	Analyze Operating Systems for Handheld Systems					K5
5	Analyze Operating Systems like LINUX and iOS					K5, K6
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
Unit:1	BASICS OF OPERATING SYSTEMS					18 hours
Basics of Operating Systems: What is an Operating System? – Main frame Systems – Desktop Systems – Multiprocessor Systems – Distributed Systems – Clustered Systems – Real-Time Systems – Handheld Systems – Feature Migration – Computing Environments -Process Scheduling – Cooperating Processes – Inter Process Communication- Deadlocks – Prevention – Avoidance – Detection – Recovery.						
Unit:2	DISTRIBUTED OPERATING SYSTEMS					15 hours
Distributed Operating Systems: Issues – Communication Primitives – Lamport’s Logical Clocks – Deadlock handling strategies – Issues in deadlock detection and resolution-distributed file systems – design issues – Case studies – The Sun Network File System-Coda.						
Unit:3	REAL TIME OPERATING SYSTEM					15 hours
Realtime Operating Systems : Introduction – Applications of Real Time Systems – Basic Model of Real Time System – Characteristics – Safety and Reliability - Real Time Task Scheduling						
Unit:4	HANDELD SYSTEM					15 hours

Operating Systems for Handheld Systems: Requirements – Technology Overview – Handheld Operating Systems – Palm OS – Symbian Operating System – Android – Architecture of Android –		
Securing handheld systems		
Unit:5	CASE STUDIES	10 hours
Case Studies : Linux System: Introduction – Memory Management – Process Scheduling – Scheduling Policy - Managing I/O devices – Accessing Files- iOS : Architecture and SDK Framework - Media Layer - Services Layer - Core OS Layer - File System.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars – webinars		
	Total Lecture hours	75 hours

II – SEMESTER

Coursecode	Core - VI	ADVANCEDJAVAPROGRAMMING	L	T	P	C
Core/Elective/Supportive	Core		5	-	-	4
Pre-requisite	Basics of Java & its Usage		CIA 25	ESE 75		
CourseObjectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. Enable the student to learn the basic functions, principles and concepts of advanced java programming. 2. Provide knowledge on concepts needed for distributed Application Architecture. 3. Learn JDBC, Servlet packages, JQuery, Java Server Pages and JAR file format 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand the advanced concepts of Java Programming					K1, K2
2	Understand JDBC and RMI concepts					K2, K3
3	Apply and analyze Java in Database					K3, K4
4	Handle different event in java using the delegation event model, event listener and class					K5
5	Design interactive applications using Java Servlet, JSP and JDBC					K5, K6
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
Unit:1	BASICS OF JAVA				15 hours	
Java Basics Review: Components and event handling – Threading concepts – Networking features – Media techniques						
Unit:2	REMOTE METHOD INVOCATION				15 hours	
Remote Method Invocation- Distributed Application Architecture- Creating stubs and skeletons- Defining Remote objects- Remote Object Activation- Object Serialization- Java Spaces						
Unit:3	DATABASE				15 hours	
Java in Databases- JDBC principles – database access- Interacting- database search – Creating multimedia databases – Database support in web applications						
Unit:4	SERVLETS				15 hours	
Java Servlets: Java Servlet and CGI programming- A simple java Servlet- Anatomy of a java Servlet- Reading data from a client- Reading http request header- sending data to a client and writing the http response header- working with cookies Java Server Pages: JSP Overview- Installation- JSP tags- Components of a JSP page- Expressions- Scriptlets- Directives- Declarations- A complete example						
Unit:5	ADVANCED TECHNIQUES				13 hours	

JARfileformatcreation–Internationalization–SwingProgramming–Advancedjava		
techniques

Coursecode	Elective – III	Data Mining With WEKA and R Lab	L	T	P	C
Core/Elective/Supportive	Elective		-	-	5	3
Pre-requisite	Basics of Data Mining concepts		CIA 40		ESE 60	
CourseObjectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. This course presents an overview of concepts of data mining algorithms 2. To understand the preprocessing concepts in weka programs 3. To Understand the Association rule mining, classification and clustering using weka 4. To implement the basic programs of R 5. To import CSV data into R 						
ExpectedCourseOutcomes:						
On the successful completion of the course, student will be able to:						
1	Able to implement in weka using data mining concepts					K1,K2
2	To understand the concepts of preprocessing.					K2,K3
3	Implementation of association rule mining, classification and clustering using weka					K3,K4
4	To implement the basic programs of R					K4,K5
5	To import CSV data into R					K5,K6
K1-Remember;K2-Understand;K3-Apply;K4-Analyze;K5-Evaluate; K6-Create						
			LIST OF PROGRAMS			75 hours
Using weka tool						
<ol style="list-style-type: none"> 1. Demonstration of preprocessing on dataset student.arff 2. Demonstration of preprocessing on dataset labor.arff 3. Demonstration of Association rule process on dataset contactlenses.arff using apriori algorithm 4. Demonstration of Association rule process on dataset test.arff using apriori algorithm 5. Demonstration of classification rule process on dataset student.arff using j48 algorithm 6. Demonstration of classification rule process on dataset employee.arff using j48 algorithm 7. Demonstration of classification rule process on dataset employee.arff using id3 algorithm 8. Demonstration of classification rule process on dataset employee.arff using naïve bayes algorithm 9. Demonstration of clustering rule process on dataset iris.arff using simple k-means 10. Demonstration of clustering rule process on dataset student.arff using simple k- means 						

Using R-Tool :

1. Find Sum, Mean and Product of Vector in R
2. R Program to sample from a Population
3. R Program to Sort a Vector.
4. To combine the matrix using rbind and cbind methods.
5. Use seq() to create sequence.
6. Write a program to convert the table data into data frame.
7. Calculate student mark list and output it in data frame.
8. R Program to Check Prime Number
9. R Program to Check for Leap Year.
10. R Program to Check if a Number is Odd or Even in R
11. R Program to Find the Sum of Natural Numbers
12. Convert Decimal into Binary using Recursion in R
13. R program to Find the Factorial of a Number Using Recursion
14. R Program to Make a Simple Calculator
15. Write a R Program to import CSV data into R.
16. Write a R Program to move the result data from R to CSV.
17. Draw the Line Graph for Student Data.
18. Draw the Pie-Chart for Employee Data.
19. Create a Table from the existing data set in R and draw the chart.
20. Apply K-Means Algorithm for IRIS data set and output it in graph
21. Get some input from mtcars data set and perform analysis

Note: The above are sample problems; Instructor can add more exercises based on their requirements and the current technology

Core/Elective/Supportive		Elective	-	-	5	3
Pre-requisite		Basics in Java Programming	CIA 40		ESE 60	
Course Objectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. To enable the students to implement the simple programs using JSP, JAR 2. To provide knowledge on using Servlets, Applets 3. To introduce JDBC and navigation of records 4. To understand RMI & its implementation 5. To introduce to Socket programming 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand to implement concepts of Java using HTML forms, JSP & JAR				K1, K2	
2	Must be capable of implementing JDBC and RMI concepts				K3, K4	
3	Able to write Applets with Event handling mechanism				K4, K5	
4	To Create interactive web based applications using servlets and jsp				K5, K6	
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
LIST OF PROGRAMS					75 hours	
<ol style="list-style-type: none"> 1. Display a welcome message using Servlet. 2. Design a Purchase Order form using Html form and Servlet. 3. Develop a program for calculating the percentage of marks of a student using JSP. 4. Design a Purchase Order form using Html form and JSP. 5. Prepare an Employee payslip using JSP. 6. Write a program using JDBC for creating a table, Inserting, Deleting records and list out the records. 7. Write a program using Java servlet to handle form data. 8. Write a simple Servlet program to create a table of all the headers it receives along with their associated values. 9. Write a program in JSP by using session object. 10. Write a program to build a simple Client Server application using RMI. 11. Create an applet for a calculator application. 12. Program to send a text message to another system and receive the text message from the system (use socket programming).

III SEMESTER

Coursecode	Core - VII	DIGITALIMAGEPROCESSING	L	T	P	C
Core/Elective/Supportive	Core		5	-	-	4
Pre-requisite	Basics of Image Processing		CIA 25	ESE 75		
CourseObjectives:						
Themain objectivesof thiscourseareto:						
<ol style="list-style-type: none"> 1. Learnbasicimageprocessingtechniquesforsolvingreal problems. 2. Gainknowledgeinimagetransformationand Imageenhancementtechniques. 3. LearnImagecompressionandSegmentation procedures. 						
ExpectedCourseOutcomes:						
On the successful completion of the course, student will be able to:						
1	UnderstandthefundamentalsofDigitalImage Processing					K1,K2
2	Understandthematematicalfoundationsfordigitalimagerepresentation, image acquisition, image transformation, and image enhancement					K2,K3
3	Apply, Design and Implement and get solutions for digital image processingproblems					K3,K4
4	Applytheconceptsoffilteringandsegmentationfordigitalimageretrieval					K4,K5
5	Explore the concepts of Multi-resolution process and recognize the objects in an efficient manner					K5,K6
K1-Remember;K2-Understand;K3-Apply;K4-Analyze;K5-Evaluate; K6-Create						
Unit:1	INTRODUCTION				15 hours	
Introduction: What is Digital image processing – the origin of DIP – Examples of fields that use DIP – Fundamentals steps in DIP – Components of an image processing system. Digital Image Fundamentals: Elements of Visual perception – Light and the electromagnetic spectrum – Image sensing and acquisition – Image sampling and Quantization – Some Basic relationship between Pixels – Linear & Nonlinear operations.						
Unit:2	IMAGEENHANCEMENT				17 hours	
Image Enhancement in the spatial domain:- Background – some basic Gray levelTransformations – Histogram Processing – Enhancement using Arithmetic / Logic operations – Basics of spatial filtering – Smoothing spatial filters – Sharpening spatial filters – Combining spatial enhancement methods.						
Unit:3	IMAGERESTORATION				18 hours	

Image Restoration: A model of the Image Degradation / Restoration Process – Noise models – Restoration is the process of noise only – Spatial Filtering – Periodic Noise reduction by frequency domain filtering – Linear, Portion – Invariant Degradations – Estimating the degradation function – Inverse filtering – Minimum mean square Error Filtering – Constrained least squares filtering – Geometric mean filter – Geometric Transformations.

Unit:4	IMAGECOMPRESSION	10 hours
---------------	-------------------------	-----------------

ImageCompression:Fundamentals–Imagecompressionmodels–ElementsofInformation Theory – Error Free compression – Lossy compression – Image compression standards.

Unit:5	IMAGESEGMENTATION	13 hours
---------------	--------------------------	-----------------

Image Segmentation: Detection and Discontinuities – Edge Linking and Boundary deduction – Thresholding – Region-Based segmentation – Segmentation by Morphological watersheds – The use of motion in segmentation.

Unit:6	ContemporaryIssues	2 hours
---------------	---------------------------	----------------

Expertlectures,onlineseminars –webinars

	TotalLecturehours	75 hours

Core/Elective/Supportive		Core	5	-	-	4
Pre-requisite		Basics of Cloud & its Applications	CIA 25		ESE 75	
Course Objectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. Gain knowledge on cloud computing, cloud services, architectures and applications. 2. Enable the student to learn the basics of cloud computing with real-time usage 3. How to store and share, in and from cloud? 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand the concepts of Cloud and its services					K1, K2
2	Collaborate Cloud for Event & Project Management					K3, K4
3	Analyze on cloud in – Word Processing, Spread Sheets, Mail, Calendar, Database					K4, K5
4	Analyze cloud in social networks					K5, K6
5	Explore cloud storage and sharing					K6
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
Unit:1	INTRODUCTION					15 hours
INTRODUCTION Cloud Computing Introduction, From, Collaboration to cloud, Working of cloud computing, pros and cons, benefits, developing cloud computing services, Cloud service development, discovering cloud services.						
Unit:2	CLOUDCOMPUTING					15 hours
CLOUD COMPUTING FOR EVERYONE Centralizing email communications, cloud computing for community, collaborating on schedules, collaborating on group projects and events, cloud computing for corporation, mapping, schedules, managing projects, presenting on road.						
Unit:3	CLOUDSERVICES					15 hours
USING CLOUD SERVICES Collaborating on calendars, Schedules and task management, exploring on line scheduling and planning, collaborating on event management, collaborating on contact management, collaborating on project management, collaborating on word processing, spreadsheets, and databases.						
Unit:4	OUTSIDETHECLOUD					15 hours
OUTSIDETHECLOUD Evaluating webmail services, Evaluating instant messaging, Evaluating web conferencing tools, creating groups on social networks, Evaluating online						

groupware, collaborating via blogs and wikis.		
Unit:5	STORING AND SHARING	13 hours
STORING AND SHARING Understanding cloud storage, evaluating on line file storage, exploring on line book marking services, exploring on line photo editing applications, exploring photo sharing communities, controlling it with web based desktops.

Coursecode	Core – IX	NETWORK SECURITY AND CRYPTOGRAPHY	L	T	P	C
Core/Elective/Supportive		Core	5	-	-	4
Pre-requisite		Basics of Networks & its Security	CIA 25		ESE 75	
Course Objectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. Enable students to learn the Introduction to Cryptography, Web Security and Case studies in Cryptography. 2. To gain knowledge on classical encryption techniques and concepts of modular arithmetic and number theory. 3. To explore the working principles and utilities of various cryptographic algorithms including secret key cryptography, hashes and message digests, and public key algorithms. 4. To explore the design issues and working principles of various authentication Applications and various secure communication standards including Kerberos, IPsec, and SSL/TLS and email. 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand the process of the cryptographic algorithms					K1, K2
2	Compare and apply different encryption and decryption techniques to solve problems related to confidentiality and authentication					K2, K3
3	Apply and analyze appropriate security techniques to solve network security problem					K3, K4
4	Explore suitable cryptographic algorithms					K4, K5
5	Analyze different digital signature algorithms to achieve authentication and design secure applications					K5, K6
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
Unit:1	INTRODUCTION					15 hours
Introduction to Cryptography – Security Attacks – Security Services – Security Algorithm- Stream cipher and Block cipher - Symmetric and Asymmetric-key Cryptosystem Symmetric Key Algorithms: Introduction – DES – Triple DES – AES – IDEA – Blowfish – RC5.						
Unit:2	CRYPTOSYSTEM					18 hours
Public-key Cryptosystem: Introduction to Number Theory-RSA Algorithm–Key Management -Diffie-Hellman Key exchange–Elliptic Curve Cryptography Message Authentication and Hash functions – Hash and Mac Algorithm – Digital Signatures and Authentication Protocol.						
Unit:3	NETWORK SECURITY					15 hours
Network Security Practice: Authentication Applications–Kerberos–X.509 Authentication services and Encryption Techniques. E-mail Security – PGP – S / MIME – IP Security.						

Unit:4	WEB SECURITY	10hours
WebSecurity-SecureSocketLayer–SecureElectronicTransaction.SystemSecurity-Intruders and Viruses – Firewalls– Password Security.		
Unit:5	CASE STUDY	15 hours
CaseStudy:ImplementationofCryptographicAlgorithms–RSA–DSA–ECC(C/JAVA Programming).Network Forensic – Security Audit - Other Security Mechanism: Introduction to: Stenography –Quantum Cryptography – Water Marking - DNA Cryptography		
Unit:6	ContemporaryIssues	2 hours
Expertlectures,onlineseminars–webinars

Coursecode	Elective – V	DIGITAL IMAGE PROCESSING LAB USING MATLAB	L	T	P	C
Core/Elective/Supportive		Elective	-	-	5	3
Pre-requisite		Basic Programming of Image Processing & an intro to MATLAB	CIA 40		ESE 60	
Course Objectives:						
The main objectives of this course are to:						
1. To understand the basics of Digital Image Processing fundamentals, image enhancement and image restoration techniques						
2. To enable the student to learn the fundamentals of image compression and segmentation						
3. To understand Image Restoration & Filtering Techniques						
4. Implementation of the above using MATLAB						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To write programs in MATLAB for image processing using the techniques					K1, K2
2	To be able to implement Image Enhancements & Restoration techniques					K2, K3
3	Capable of using Compression techniques in an Image					K3, K4
4	Must be able to manipulate the image and Segment it					K5, K6
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
LIST OF PROGRAMS						75 hours
1. Implement Image enhancement Technique.						
2. Histogram Equalization						
3. Image Restoration.						
4. Implement Image Filtering.						
5. Edge detection using Operators (Roberts, Prewitts and Sobel operators)						
6. Implement image compression.						
7. Image Subtraction						
8. Boundary Extraction using morphology.						
9. Image Segmentation

Coursecode	Core industry Module	Statistical Computing				L	T	P	C
Core/Elective/Supportive		Core industry Module				5	-	-	3
Pre-requisite		Basic knowledge of statistical concepts				CIA 25		ESE 75	
CourseObjectives:									
Themain objectivesof thiscourseareto:									
<ol style="list-style-type: none"> 1. To understand the applications of various correlation methods 2. To study and model the sampling concepts 3. To acquire knowledge on Hypotheses test 									
ExpectedCourseOutcomes:									
On the successful completion of the course, student will be able to:									
1	To understand the concepts of Correlation								K1,K2
2	To able to know the Regression Analysis								K2,K3
3	To make understand the Probability Distribution and mathematical Expectation								K3,K4
4	To know the Sampling and Sampling Distributions								K4,K5
5	To understand the Statistical Inference								K6
K1-Remember;K2-Understand;K3-Apply;K4-Analyze;K5 -Evaluate; K6-Create									

Unit:1		15 hours
Correlation - Definition of Correlation- Scatter Diagram- Kari Pearson's Coefficient of Linear Correlation- Coefficient of Correlation and Probable Error of r- Coefficient of Determination - Merits and Limitations of Coefficient of Correlation- Spearman's Rank Correlation(7.1-7.9.4).		
Unit:2		15 hours
Regression Analysis - Regression and Correlation(Intro)- Difference between Correlation and Regression Analysis- Linear Regression Equations -Least Square Method- Regression Lines- Properties of Regression Coefficients- Standard Error of Estimate.(8.1-8.8)		
Unit:3		15 hours
Probability Distribution and mathematical Expectation- Random Variable- Defined - Probability Distribution a Random VariableExpectation of Random Variable- Properties of Expected Value and Variance(12.2-12.4).		
Unit:4		15 hours
Sampling and Sampling Distributions - Data Collection- Sampling and Non-Sampling Errors – Principles of Sampling-- Merits and Limitations of Sampling- Methods of Sampling- Parameter and Statistic- Sampling Distribution of a Statistic- Examples of Sampling Distributions- Standard Normal, Student's t, Chi-Square (χ^2) and Snedecor's F- Distributions(14.1-14.16).		
Unit:5		13 hours
Statistical Inference- Estimation and Testing of Hypothesis - Statistical Inference- Estimation- Point and interval- Confidence interval using normal, t and χ^2 Distributions- Testing of HypothesisSignificance of a mean - Using t Distribution(15.1-15.10.2).		
Unit:6	Contemporary Issues	2 hours
Expertlectures,onlineseminars –webinars

Coursecode	SEC 3	Multimedia Tools Lab	L	T	P	C
Core/Elective/Supportive		Skill Enhancement Course	-	-	3	2
Pre-requisite		Basic Programming using animation and Photoshop	-		-	
Course Objectives:						
The main objectives of this course are to:						
1. To know the Basic tools used in PageMaker						
2. To know the basic knowledge of Adobe Flash						
3. Understanding Corel DRAW						
4. Understanding Photoshop						
5. To Design an image by applying Text and Transform Tool.						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To understand the basic functionalities of pagemaker				K1,K2	
2	To Learning and working with coral DRAW				K3,K4	
3	To Learning and understanding the concept of the flash				K4,K5	
4	Learning and understanding the concept of the Photoshop				K5,K6	
K1-Remember;K2-Understand;K3-Apply;K4-Analyze;K5-Evaluate; K6-Create						
LIST OF PROGRAMS					45 hours	
<p>PageMaker 6.5/7</p> <ul style="list-style-type: none"> • Editing Text ,Formatting Text ,Tracking – Kerning ,Leading ,Importing Style • Master Page ,Creating Master Page ,Applying working with graphics and objects • Managing and printing a publication. <p>CorelDRAW 9/10</p> <ul style="list-style-type: none"> • Drawing Basic Geometric Figures , Saving a file – Closing a file • Opening and Exiting CorelDRAW9/10 ,Views – The View Manager • Drawing and Selecting: Getting familiar with the toolbar • Getting started with the project • Working with text: The text tool – Getting started with the Book Cover • Converting from one text type to another,Formatting text ,The Text Editor • Working with Images: Bitmap and Vector Images • Importing Image – Resizing, Rotating and Skewing Images 						

- Cropping an Image,Exporting Images to other Applications.

Flash

- Basic tools used in Flash.Develop a Flash application using motion tween.
- Develop a Flash application using shape tween.
- Develop a Flash application for ball bouncing using motion guide path.
- Develop a Flash application for masking effect.
- Develop a Flash application using layer based animation.
- Develop a Flash application to represent the growing moon
- Write action script to play and stop an animation.
- Create an appealing animation movie of your choice combining both Motion tweening and Shape tweening. Also add appropriate sound effects.

Photoshop 6/7

- Getting started with Photoshop 6/7,Opening existing file,Guidelines for working with tool bar
- Creating a new file. Working with images and colors: Bitmap and vector images
- Opening recently used files,Image size ,Editing Photographs for own Album
- Editing Images ,Color Modes

Course code	Core - X	Big Data Analytics	L	T	P	C
Core/Elective/Supportive		Core	5	-	-	4
Pre-requisite		Basics of Data Analytics& its Applications	CIA 25		ESE 75	
Course Objectives:						
The main objectives of this course are to:						
1. To study the basic technologies that forms the foundations of Big Data.						
2. To study the programming aspects of cloud computing with a view to rapid prototyping of complex applications.						
3. To understand the specialized aspects of big data including big data application, and big data analytics.						
4. To study different types Case studies on the current research and applications of the Hadoop and big data in industry.						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	understand the building blocks of Big Data					K1,K2
2	articulate the programming aspects of cloud computing(map Reduce etc)					K2,K3
3	understand the specialized aspects of big data with the help of different big data applications					K3,K4
4	represent the analytical aspects of Big Data					K4,K5
5	know the recent research trends related to Hadoop File System, MapReduce and Google File System etc					K6
K1-Remember;K2-Understand;K3-Apply;K4-Analyze;K5 -Evaluate; K6-Create						
Unit:1	Data Explosion and Big Data Analytics					15 hours
An Overview: Introduction, Evolution of Database Technology and Big Data, Elements of Big Data, Big Data System Components, Big Data Analytics – Data Analytics. Types of Big Data Analytics, Applications of Big Data Technology, Challenges and Skills required with Big Data Technology. Introduction about Classification Algorithms, Regression Techniques, Domain Specific Analytic Techniques: Time Series Analysis, In Database Analytics, Text Analytics.						
Case Study: An Application of Analytics in Agriculture field, Anticipating the Market Price.						
Unit:2	Real – Time Analysis					15 hours
Introduction: Real-time System, Types of Real-time System, Types of Popular Real-time Operating systems - Advantages and Disadvantages of Real-time Operating Systems, Characteristics of Real-time Systems, Real-time Processing Systems for Big Data: Data Processing and Analytics, Big Data Engine-Hadoop, Real-time System Architecture, Real-time Platforms for Processing Big Data, Real-time Data Analytics.						
Big Data: Hardware, Technology Foundations: Introduction, Big Data Stack, Virtualization and Big Data.						

Understanding NoSQL and Hadoop Ecosystem: Introduction, NoSQL:CouchDB, MongoDB, Hadoop Ecosystem – HDFS, HBase, Yarn.		
Unit:3	High Dimensional Data and Information Retrieval	15 hours
High Dimensional Data: A Big Data Perspective: Introduction – What is Dimensionality?, Challenges in High Dimensional Data Handling – Curse of Dimensionality, Large Scale Optimization, Spurious Correlation – Endogeneity, Dimensionality Reduction – Approaches for Dimensionality Reduction, Dimensionality Reduction Techniques.		
Information Retrieval: Big Data Integration and Processing: Big Data Integration and Processing: Introduction, Components of Information Retrieval System, User Interface and Visualization – Desirable Properties, Visualization Techniques, Text Operations, Query Operations, Indexing and Ranking.		
Unit:4	R Programming and Case Study	15 hours
R Programming: Introduction, Data Types, Data Structures and Operators – Basic Data Types in R, R Operators, Vectors, List, Factor, Arrays and Matrix, Data Frame, R Programming Structure – Control statements of R: if, if-else, if-else ladder, switch-case, return, Loops and Loop Control Statements, Input / Output: Import and Export Data, Handling Missing Values, Statistical Functions and Models of R, R Graphics and Data Visualization.		
Case Study: Association Rule Mining Algorithm Implementations, K Means Clustering Algorithm Implementations, Decision Tree Algorithm Implementations, Naïve Bayes Classification Algorithm Implementation, Build the Regression Models, Construct Directed Graph using Adjacency Matrix.		
Unit:5	Mongo/DB with R Programming and Case Study	13 hours
Mongo/DB with R Programming: Introduction – Document, Collections / Views / On-Demand Materialized Views, Key Features, Document Structure of MongoDB, Datatypes in MogoDB, MongoDB Curd Operations – Basics of MongoDB CURD Operations, Detailed Discussion of MongoDB CURD Operations with examples, MongoDB with R – Import/Export SCV/JSON file at MongoDB, Interfacing R and MongoDB, GridFS.		
Case Study: Access GridFS files and show them using any front end support, Develop a solution using MongoDB and R for any application domain of your choice, Develop the coding to retrieve the content from GridFS.		
Unit:6	Contemporary Issues	2 hours
Expertlectures,onlineseminars –webinars		
TotalLecturehours		75 hours

Coursecode	Core – XII	WEB APPLICATION DEVELOPMENT AND HOSTING PRACTICAL	L	T	P	C
Core/Elective/Supportive	Core		-	-	5	4
Pre-requisite	Basic Programming using HTML tags		CIA 40		ESE 60	
Course Objectives:						
The main objectives of this course are to:						
1. Able to design a web page using HTML tags						
2. To enable the students to use Framesets, hyperlinks and different formatting features of HTML tags						
3. Enable the students to use Forms & other controls in a web page						
4. To create interactive applications using PHP						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand & implement the basic HTML tags to create static web pages				K1, K2	
2	Capable of using hyperlinks, frames, images, tables, in a web page				K2, K3	
3	Able to write dynamic web applications using HTML forms				K4, K5	
4	Must be able to write dynamic web applications in PHP & HTML tags using XAMPP.				K5, K6	
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
LIST OF PROGRAMS					75 hours	
1. Develop a website for your college using advanced tags of HTML.						
2. Write names of several countries in a paragraph and store it as an HTML document, world.html. Each country name must be a hot text. When you click India (for example), it must open india.html and it should provide a brief introduction about India.						
3. Develop a HTML document to i) display Text with Bullets / Numbers - Using Lists ii) to display the Table Format Data						
4. Develop a Complete Web Page using Frames and Framesets which gives the Information about a Hospital using HTML.						
5. Write a HTML document to print your Bio-Data in a neat format using several components.						
6. Develop a HTML document to display a Registration Form for an inter-collegiate function.						
7. Using HTML form accept Customer details like Name, City, Pin code, Phone number and Email address and validate the data and display appropriate messages for violations using PHP (Eg. Name is Mandatory field; Pin code must be 6 digits, etc.).						
8. Write a program to accept two numbers n1 and n2 using HTML form and display the Prime						

Numbers between n1 and n2 using PHP.

Course code	Elective – VI	ARTIFICIAL INTELLIGENCE & MACHINE LEARNING	L	T	P	C
Core/Elective/Supportive		Elective	5	-	-	3
Pre-requisite		Basics of AI & an Introduction about ML	CIA 25		ESE 75	
Course Objectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. Enable the students to learn the basic functions of AI, Heuristic Search Techniques. 2. Provide knowledge on concepts of Representations and Mappings and Predicate Logic. 3. Introduce Machine Learning with respect Data Mining, Big Data and Cloud. 4. Study about Applications & Impact of ML. 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Demonstrate AI problems and techniques					K1, K2
2	Understand machine learning concepts					K2, K3
3	Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning					K3, K4
4	Analyze the impact of machine learning on applications					K4, K5
5	Analyze and design a real world problem for implementation and understand the dynamic behavior of a system					K5, K6

K1-Remember;K2-Understand;K3-Apply;K4-Analyze;K5-Evaluate; K6-Create		
Unit:1	INTRODUCTION	15 hours
Introduction: AI Problems - AI techniques - Criteria for success. Problems, Problem Spaces, Search: State space search - Production Systems - Problem Characteristics - Issues in design of Search.		
Unit:2	SEARCHTECHNIQUES	15 hours
Heuristic Search techniques: Generate and Test - Hill Climbing- Best-First, Problem Reduction, Constraint Satisfaction, Means-end analysis. Knowledge representation issues: Representations and mappings -Approaches to Knowledge representations -Issues in Knowledge representations - Frame Problem.		
Unit:3	PREDICATELOGIC	15 hours
Using Predicate logic: Representing simple facts in logic - Representing Instance and Isa relationships - Computable functions and predicates - Resolution - Natural deduction. Representing knowledge using rules: Procedural Vs Declarative knowledge- Logic programming -Forward Vs Backward reasoning -Matching-Control knowledge.		
Unit:4	MACHINE LEARNING	15 hours
UnderstandingMachineLearning:WhatIsMachineLearning?-DefiningBigData-BigDatain ContextwithMachineLearning-TheImportanceoftheHybridCloud-LeveragingthePowerof Machine Learning-The Roles of Statistics and Data Mining with Machine Learning-Putting Machine Learning in Context-Approaches to Machine Learning.		
Unit:5	APPLICATIONS OF MACHINE LEARNING	13 hours
Looking Inside Machine Learning: The Impact of Machine Learning on Applications-Data Preparation-The Machine Learning Cycle.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars –webinars		
	Total Lecture hours	75 hours
Text Books

ADDITION LIST OF ELECTIVE COURSES

Coursecode	EMBEDDED SYSTEMS				L	T	P	C
Core/Elective/Supportive	Elective				4			4
Pre-requisite	Basics of Micro Controller							
Course Objectives:								
The main objectives of this course are to:								
<ol style="list-style-type: none"> 1. Present the introduction to 8051 Microcontroller Instruction Set, concepts on RTOS & Software tools. 2. Gain the knowledge about the embedded software development. 3. Learn about Microcontroller and software tools in the embedded systems. 								
Expected Course Outcomes:								
On the successful completion of the course, student will be able to:								
1	Understand the concept of 8051 microcontroller						K1, K2	
2	Understand the Instruction Set and Programming						K2, K3	
3	Analyze the concepts of RTOS						K3, K4	
4	Analyze and design various real-time embedded systems using RTOS						K5	
5	Debug the malfunctioning system using various debugging techniques						K5, K6	
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6- Create								
Unit:1	8051 MICROCONTROLLER						12Hours	
8051 Microcontroller: Introduction-8051 Architecture-Input/Output Pins, Ports and Circuits- External Memory - Counters / Timers - Serial Data Input / Output - Interrupts								
Unit:2	PROGRAMMING BASICS						12Hours	
Instruction Set and Programming Moving Data-Addressing Modes-Logical operations-Arithmetic Operation-Jump and Call Instructions-Simple Program. Applications: Keyboard Interface- Display Interface-Pulse Measurements-DIA and AID Conversions-Multiple Interrupts.								
Unit:3	CONCEPTS ON RTOS						12Hours	

CONCEPTS ON RTOS: Introduction to RTOS-Selecting an RTOS-Task and Task states - Tasks and data- Semaphores and shared data. MORE operating systems services: Interrupt Process communication - Message Queues, Mailboxes and pipes- Timer Functions-Events - Memory Management-Interrupt Routines in an RTOS Environment.

Unit:4	DESIGN USING RTOS	10Hours
---------------	--------------------------	----------------

Basic Design using a RTOS: Principles - Encapsulating semaphores and Queues-Hard real time scheduling considerations-Saving memory space and power- introductions to RTL & QNX.

Unit:5	SOFTWARE TOOLS	12Hours
---------------	-----------------------	----------------

SOFTWARE TOOLS: Embedded software Development Tools: Hosts and Target Machines- Linker/Locators for Embedded software-getting Embedded software into the Target systems. Debugging Techniques: Testing on your Host machine -Instruction set simulators- The assert macro- using laboratory tools.

Unit:6	Contemporary Issues	2 hours
---------------	----------------------------	----------------

Expert lectures, online seminars – webinars

	Total Lecture hours	60Hours
--	----------------------------	----------------

Text Books

Coursecode	CRITICAL THINKING, DESIGN THINKING AND PROBLEMSOLVING		L	T	P	C
Core/Elective/Supportive	Elective		4			4
Pre-requisite	Basics of Logical & Reasoning Skills					
Course Objectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. Learn critical thinking and its related concepts 2. Learn design thinking and its related concepts 3. Develop Thinking patterns, Problem solving & Reasoning 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand the concepts of Critical thinking and its related technology				K1, K2	
2	Focus on the explicit development of critical thinking and problem solving skills				K2, K3	
3	Apply design thinking in problems				K3, K4	
4	Make a decision and take actions based on analysis				K4, K5	
5	Analyze the concepts of Thinking patterns, Problem solving & Reasoning in real time applications				K5, K6	
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
Unit:1	CRITICAL THINKING				12hours	
Critical Thinking: Definition, Conclusions and Decisions, Beliefs and Claims, Evidence –finding, evaluation, Inferences, Facts – opinion, probable truth, probably false, Venn diagram. Applied critical thinking: Inference, Explanation, Evidence, Credibility, Two Case Studies, critical thinking and science, critical evaluation, self assessment.						
Unit:2	DESIGN THINKING				12hours	
Design Thinking: Introduction, Need of Design Thinking, problem to question - design thinking process, Traditional Problem Solving versus Design Thinking, phases of Design Thinking, problem exploration, Stake holder assessment, design thinking for manufacturers, smart Idea to implementation.						
Unit:3	CASE STUDY				12hours	
Thinking to confidence, fear management, duty Vs passion, Team management, Tools for Thinking, prototype design, Relevance of Design and Design Thinking in engineering, human centered design, case study: apply design thinking in problem.						
Unit:4	PROBLEMSOLVING				10hours	
Problem solving: problem definition, problem solving methods, selecting and using information, data processing, solution methods, solving problems by searching, recognizing patterns, spatial						

reasoning,necessityandsufficiency, choosingandusingmodels,makingchoicesanddecisions.										
Unit:5		REASONING							12hours	
Reasoning: Deductive and hypothetical reasoning, computational problem solving; generating, implementing, and evaluating solutions, interpersonal problem solving. Advanced problem solving: Combining skills – using imagination, developing models, Carrying out investigations, Data analysis and inference. Graphical methods of solution, Probability, tree diagrams and decision trees

Coursecode		MOBILECOMPUTING	L	T	P	C
Core/Elective/Supportive		Elective	4			4
Pre-requisite		BasicsofMobile Communication				
CourseObjectives:						
Themain objectivesof thiscourseareto:						
<ol style="list-style-type: none"> 1. PresenttheoverviewofMobilecomputing,Applicationsand Architectures. 2. Describethefuturisticcomputing challenges. 3. Enablethestudentstolearntheconceptofmobile computing. 						
ExpectedCourseOutcomes:						
On the successful completion of the course, student will be able to:						
1	Understandtheneedandrequirements ofmobile communication					K1,K2
2	Focusonmobilecomputingapplicationsandtechniques					K2,K3
3	Demonstratesatellitecommunicationinmobile computing					K4
4	Analyzeaboutwirelesslocalloop architecture					K5,K6
5	Analyzevariousmobilecommunicationtechnologies					K6
K1-Remember;K2-Understand;K3-Apply; K4-Analyze;K5-Evaluate; K6-Create						
Unit:1	INTRODUCTION					12hours
Introduction: Advantages of Digital Information - Introduction to Telephone Systems –Mobile communication: Need for Mobile Communication – Requirements of Mobile Communication – History of Mobile Communication.						
Unit:2	MOBILECOMMUNICATION					12hours
Introduction to Cellular Mobile Communication – Mobile Communication Standards –Mobility Management – Frequency Management – Cordless Mobile Communication Systems.						
Unit:3	MOBILECOMPUTING					12hours
Mobile Computing: History of data networks – Classification of Mobile data networks - CDPD System – Satellites in Mobile Communication: Satellite classification – Global Satellite Communication – Changeover from one satellite to other – Global Mobile Communication – Interferences in Cellular Mobile Communication.						
Unit:4	MOBILECOMMUNICATIONSYSTEM					11hours
Important Parameters of Mobile Communication System – Mobile Internet: Working of Mobile IP – Wireless Network Security – Wireless Local Loop Architecture: Components in WLL – Problems in WLL – Modern Wireless Local Loop – Local Multipoint Distribution Service – Wireless Application Protocol.						
Unit:5	COMMUNICATIONTECHNOLOGY					11hours

WCDMA Technology and Fiber Optic Microcellular Mobile Communication – Ad hoc Network and Bluetooth technology – Intelligent Mobile Communication system – Fourth Generation Mobile Communication systems.

Coursecode	BLOCKCHAIN TECHNOLOGY		L	T	P	C
Core/Elective/Supportive	Elective		4			4
Pre-requisite	Basics of BlockChain & Crypto Currency					
Course Objectives:						
The main objectives of this course are to:						
<ol style="list-style-type: none"> 1. Understand the fundamentals of blockchain and cryptocurrency. 2. Understand the influence and role of block chain in various other fields. 3. Learn security features and its significance. 4. Identify problems & challenges posed by BlockChain. 						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Demonstrate blockchain technology and crypto currency				K1, K2	
2	Understand the mining mechanism in blockchain				K2	
3	Apply and identify security measures, and various types of services that allow people to trade and transact with bitcoins				K3, K4	
4	Apply and analyze BlockChain in healthcare industry				K4, K5	
5	Analyze security, privacy, and efficiency of a given BlockChain system				K5, K6	
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create						
Unit:1	INTRODUCTION				12hours	
Introduction to Blockchain - The big picture of the industry – size, growth, structure, players. Bitcoin versus Cryptocurrencies versus Blockchain - Distributed Ledger Technology (DLT). Strategic analysis of the space – Blockchain platforms, regulators, application providers. The major application: currency, identity, chain of custody.						
Unit:2	NETWORK AND SECURITY				12hours	
Advantage over conventional distributed database, Blockchain Network, Mining Mechanism, Distributed Consensus, Blockchain 1.0, 2.0 and 3.0 – transition, advancements and features. Privacy, Security issues in Blockchain.						
Unit:3	CRYPTOCURRENCY				12hours	
Cryptocurrency - History, Distributed Ledger, Bitcoin protocols -Symmetric-key cryptography - Public-key cryptography - Digital Signatures -High and Low trust societies - Types of Trust model: Peer-to-Peer, Leviathan, and Intermediary. Application of Cryptography to Blockchain						
Unit:4	CRYPTOCURRENCY REGULATION				11hours	
Cryptocurrency Regulation-Stakeholders, Roots of Bitcoin, Legal views-exchange of cryptocurrency-Black Market-Global Economy. Crypto economics – assets, supply and						

Demand, inflation and deflation – Regulation.		
Unit:5	CHALLENGES IN BLOCKCHAIN	11 hours
Opportunities and challenges in Block Chain – Application of block chain: Industry 4.0 – machine to machine communication – Data management in industry 4.0 – future prospects. Block chain in Health 4.0 – Blockchain properties - Healthcare Costs - Healthcare Quality - Healthcare Value - Challenges for using blockchain for healthcare data		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars – webinars		
	Total Lecture hours	60 hours

Coursecode	WEB SERVICES			L	T	P	C
Core/Elective/Supportive	Elective			4			4
Pre-requisite	BasicsofDistributedComputing						
CourseObjectives:							
Themain objectivesof thiscourseareto:							
<ol style="list-style-type: none"> 1. Present the Web Services , Building real world Enterprise applications using Web ServiceswithTechnologiesXML, SOAP , WSDL , UDDI 2. Getoverview ofDistributedComputing,XML,andits technologies 3. UpdatewithQoSanditsfeatures 4. DevelopStandards andfutureofWeb Services 							
Expected Course Outcomes:							
On the successful completion of the course, student will be able to:							
1	Understandwebservices anditsrelated technologies					K1,K2	
2	UnderstandXMLconcepts					K2,K3	
3	AnalyzeonSOAPandUDDImodel					K4,K5	
4	Demonstratetheroad mapforthe standardsandfutureofweb services					K5	
5	AnalyzeQoSenabledapplicationsinwebservices					K5,K6	
K1-Remember;K2-Understand;K3-Apply;K4-Analyze;K5-Evaluate; K6-Create							
Unit:1	INTRODUCTION					12hours	
Introduction to web services – Overview of Distributed Computing- Evolution and importance of web services-Industry standards, Technologies and concepts underlying web services-Web services and enterprises-web services standards organization-web services platforms.							
Unit:2	XMLFUNDAMENTALS					12hours	
XMLFundamentals–XMLdocuments-XMLNamespaces-XMLSchema–ProcessingXML.							
Unit:3	SOAP MODEL					12hours	
SOAP: The SOAP model- SOAP messages-SOAP encoding- WSDL: WSDL structure-interfacedefinitions-bindings-services-Using SOAP and WSDL-UDDI: About UDDI- UDDI registrySpecification- Core data structures-Accessing UDDI							
Unit:4	TECHNOLOGIESANDSTANDARDS					12hours	
Advanced web services technologies and standards: Conversations overview-web services conversation language-WSCL interface components. Workflow: business process management-workflows and workflow management systems Security: Basics-data handling and forwarding-data storage-errors-Web services security issues.							

Unit:5	QUALITYOFSERVICE	10hours
Quality of Service: Importance of QoS for web services-QoS metrics-roles-design patterns-QoS enabled web services-QoS enabled applications. Web services management-web services standards and future trends.

Coursecode	ROBOTICPROCESSAUTOMATION FOR BUSINESS			L	T	P	C
Core/Elective/Supportive	Elective			4			4
Pre-requisite	Basics of Robots & its Applications						
Course Objectives:							
The main objectives of this course are to:							
<ol style="list-style-type: none"> 1. Learn the concepts of RPA, its benefits, types and models. 2. Gain the knowledge in application of RPA in Business Scenarios. 3. Identify measures and skills required for RPA 							
Expected Course Outcomes:							
On the successful completion of the course, student will be able to:							
1	Demonstrate the benefits and ethics of RPA					K1, K2	
2	Understand the Automation cycle and its techniques					K2	
3	Draw inferences and information processing of RPA					K3, K4	
4	Implement & Apply RPA in Business Scenarios					K5	
5	Analyze on Robots & leveraging automation					K5, K6	
K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create							
Unit:1	INTRODUCTION					12hours	
Introduction to RPA – Overview of RPA – Benefits of RPA in a business environment - Industries & domains fit for RPA - Identification of process for automation - Types of Robots - Ethics of RPA & Best Practices - Automation and RPA Concepts - Different business models for implementing RPA – Centre of Excellence – Types and their applications – Building an RPA team - Approach for implementing RPA initiatives.							
Unit:2	AUTOMATION					12hours	
Role of a Business Manager in Automation initiatives - Skills required by a Business Manager for successful automation - The importance of a Business Manager in automation - Analyzing different business processes - Process Mapping frameworks - Role of a Business Manager in successful implementation – Part 1 - Understanding the Automation cycle – First 3 automation stages and activities performed by different people.							
Unit:3	AUTOMATION IMPLEMENTATION					12hours	
Evaluating the Automation Implementation Detailed description of last 3 stages and activities performed by different people - Role of a Business Manager in successful completion – Part 2 - Activities to be performed post-implementation - Guidelines for tracking the implementation success - Metrics/Parameters to be considered for gauging success - Choosing the right licensing option - Sending emails - Publishing and Running Workflows.							
Unit:4	ROBOT					12hours	

Ability to process information through scopes/systems - Understand the skill of information processing and its use in business - Leveraging automation - Creating a Robot - New Processes. Establish causality by variable behavior - Understand the skill of drawing inference or establishing causality by tracking the behavior of a variable as it varies across time/referenced variable - Leveraging automation for this skill - Robot & new process creation.		
Unit:5	ROBOTSKILL	10hours
Inference from snapshots of curated terms – Omni-source data curation - Multisource trend tracking - Understand the skill of drawing inference from the behavior of curated terms by taking snapshots across systems in reference to time/variable(s) - Leveraging automation for this skill – Robot creation and new process creation for this skill.
